### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Previously withdrawn claims 8-11 have been rejoined with the allowed claims.

### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: the prior art fails to teach a protein layer bound to low molecular weight antigens with a linker molecule having functional end groups connected with an aliphatic hydrocarbon chain of 1, 2 or 3 carbon atoms, wherein the antigens are reversibly bound to antibodies specific for the antigens.
2. Sakai et al. (Sensor and Actuators) teach a morphine antigen connected to a BSA protein using a linker that contains 4 carbon atoms, but fail to teach a carbon linker having 1, 2 or 3 atoms. Sakai et al. also teach that when 4 carbon atoms are used in the linker, the antigens are not reversibly bound to antibodies specific for the antigens. Therefore based on the teaching of Sakai et al., it would not have been obvious to use a linker shorter than 4 carbons because one having ordinary skill would not have expected a reversible binding between the antibody and antigen.
3. Jacobs et al. (US 6,905,816) teach a bifunctional linker having 0 to 50 carbon atoms, and specifically teaches linkers that have 2 carbon atoms. However, Jacobs et

al. teach many different linkers with a wide range of number of carbon atoms and do not specifically point to a linker having 1, 2 or 3 carbon atoms. Furthermore, Jacobs et al. do no teach the linker being between an antigen and a protein.

4. Miura et al. (US 2002/0009812) teach a morphine-BSA conjugate, which is an antigen attached to a protein through a linker, but do not specifically teach the recited bifunctional linker and an aliphatic carbon chain that contains 1, 2 or 3 carbon atoms.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
